Module Name: Login Page - Functional Test Cases (AI-Assisted Selenium Automation)
Test Case ID: TC-12
Tester Name: Aman Sevak
Webpage URL: https://www.saucedemo.com

- ## Scenario ID: 1a

Scenario: Login with valid credentials
Test Data: standard_user / secret_sauce
Expected Result: User reaches the Products page; PASS messages printed in console
Actual Result: Products page displayed; console printed PASS messages
Status: Pass
Test Steps:

1. Open the SauceDemo login page
2. Enter Username standard_user
3. Enter Password secret_sauce
4. Click on Login
5. Validate that the URL contains "inventory"

Screenshots:

- ## Scenario ID: 1b

Scenario: Login with wrong password
Test Data: standard_user / wrong123
Expected Result: Error: "Username and password do not match any user in this service"

Status: Not executed in this run

Test Steps:

1. Open the login page
2. Enter valid username
3. Enter wrong password
4. Click on Login

Screenshots:

-

- ## Scenario ID: 1c

Scenario: Login with wrong username

Test Data: wrong_user / secret_sauce

Expected Result: Error: "Username and password do not match any user in this service"

Status: Not executed in this run

Test Steps:

1. Open the login page
2. Enter wrong username
3. Enter valid password
4. Click on Login

Screenshots:

-

- ## Scenario ID: 1d

Scenario: Try login with empty username

Test Data: Blank / secret_sauce

Expected Result: Error: "Username is required"

Status: Not executed in this run

Test Steps:

1. Open the login page
2. Leave username blank
3. Enter password
4. Click on Login

Screenshots:

-

- ## Scenario ID: 1e

Scenario: Try login with empty password

Test Data: standard_user / Blank

Expected Result: Error: "Password is required"

Status: Not executed in this run

Test Steps:

1. Open the login page
2. Enter username
3. Leave password blank
4. Click on Login

- ## Source Code (ai_login_test.py)

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.support.ui import WebDriverWait
from selenium.webdriver.support import expected_conditions as EC

driver = webdriver.Chrome()
driver.maximize_window()

try:
    driver.get("https://www.saucedemo.com/")

    wait = WebDriverWait(driver, 10)

    username = wait.until(
        EC.visibility_of_element_located((By.ID, "user-name"))
    )
    password = driver.find_element(By.ID, "password")
    login_button = driver.find_element(By.ID, "login-button")

    username.send_keys("standard_user")
    password.send_keys("secret_sauce")
    login_button.click()

    wait.until(EC.url_contains("inventory"))
    assert "inventory" in driver.current_url

    print("AI-Assisted Selenium Test: PASS")
    print("Requirement Validation: PASS")

except AssertionError:
    print("AI-Assisted Selenium Test: FAIL")

finally:
    driver.quit()
```

- ## Summary Of Test Results:

Total Test Cases: 5
Executed: 1
Passed: 1
Failed: 0
Not Executed: 4
Pass % (of executed): 100%

- ## Conclusion and Recommendations:

Pass Rate: 100% of executed tests. Valid login works as required.

- ## Issues Found

No defects were found in the executed test. The four negative test cases are still pending execution.

- ## Recommendations

1. Automate and execute the negative cases (1b to 1e).
2. Add assertions on the exact error message text.
3. Review all AI-generated scripts before use, as they may contain errors or wrong assumptions.

- ## Bug Reports:

None - no bugs were found in the executed test.
