Module Name: Navigation, Forms, Links and Multi-Page Workflow - Python Selenium Automation Testing
Tester Name : Aman Sevak
Test Case ID: st_11
Webpage URL: https://www.saucedemo.com/
Tools Used: Python, Selenium WebDriver, PyCharm, Google Chrome

- ## Scenario ID: 1a

Scenario: Open the SauceDemo website in Chrome
Test Steps:

1. Launch Google Chrome using Selenium WebDriver
2. Maximize the browser window
3. Open https://www.saucedemo.com/

Expected / Actual Result: Website opened successfully. Login page is displayed.
Status: **Pass**
Screenshots:

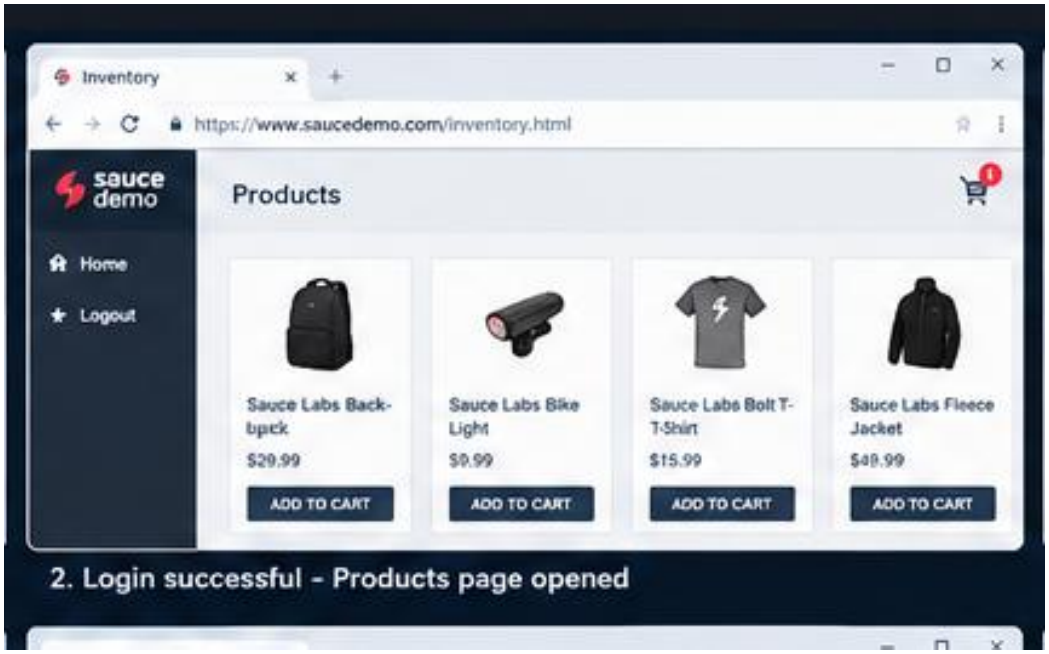

- ## Scenario ID: 1b

Scenario: Login with valid credentials
Test Steps:

1. Enter Username: standard_user
2. Enter Password: secret_sauce
3. Click on Login
4. Validate that the URL contains "inventory"

Expected / Actual Result: User logged in and Products page (inventory) opened.
Status: **Pass**

Screenshots:

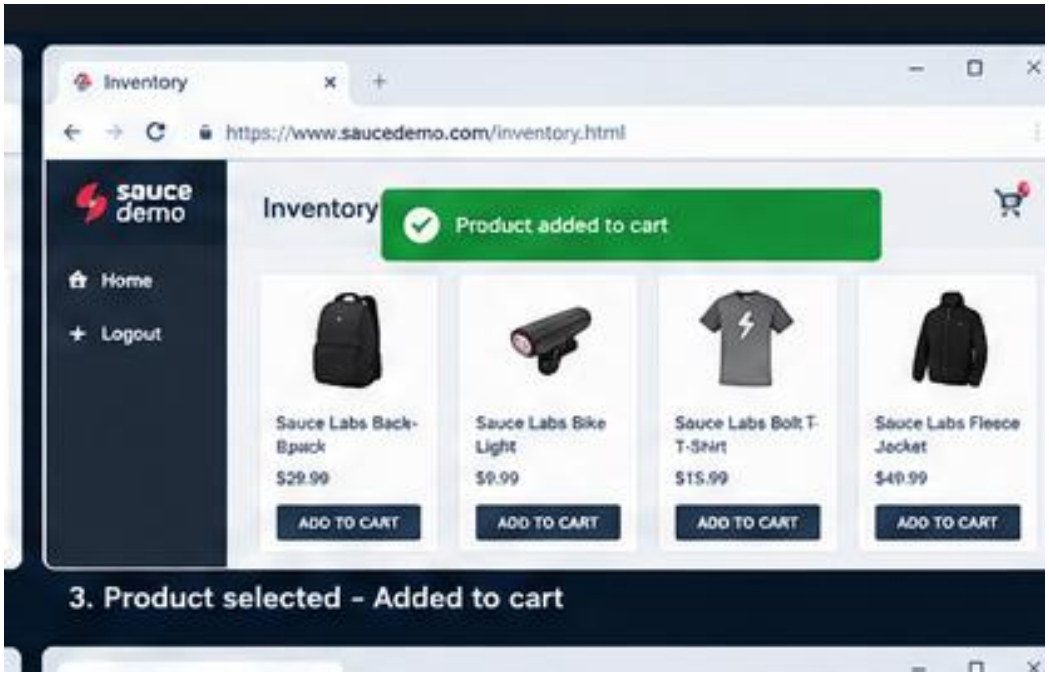

- **Scenario ID: 1c**

Scenario: Select a product (Add to Cart)
Test Steps:

1. Wait until "Add to cart" button of Sauce Labs Backpack is clickable
2. Click on Add to cart

Expected / Actual Result: Product added to the cart; cart badge updated.
Status: **Pass**
Screenshots:

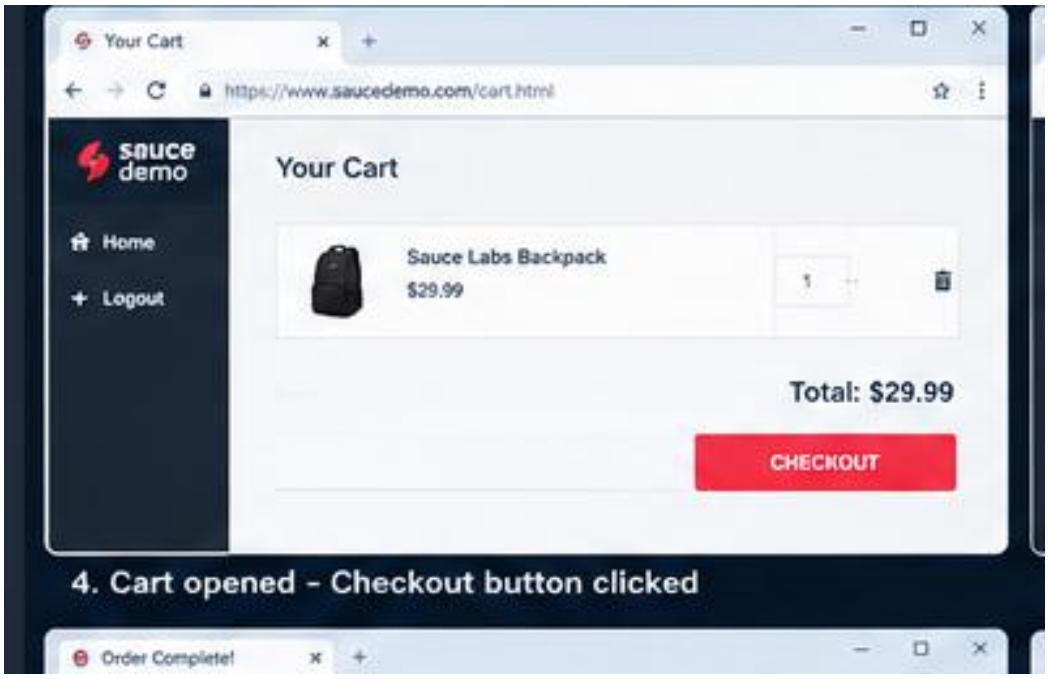

- ## Scenario ID: 1d

Scenario: Cart navigation
Test Steps:

1. Click on the shopping cart icon
2. Validate that the URL contains "cart"

Expected / Actual Result: Cart page opened and selected product is listed.
Status: **Pass**
Screenshots:

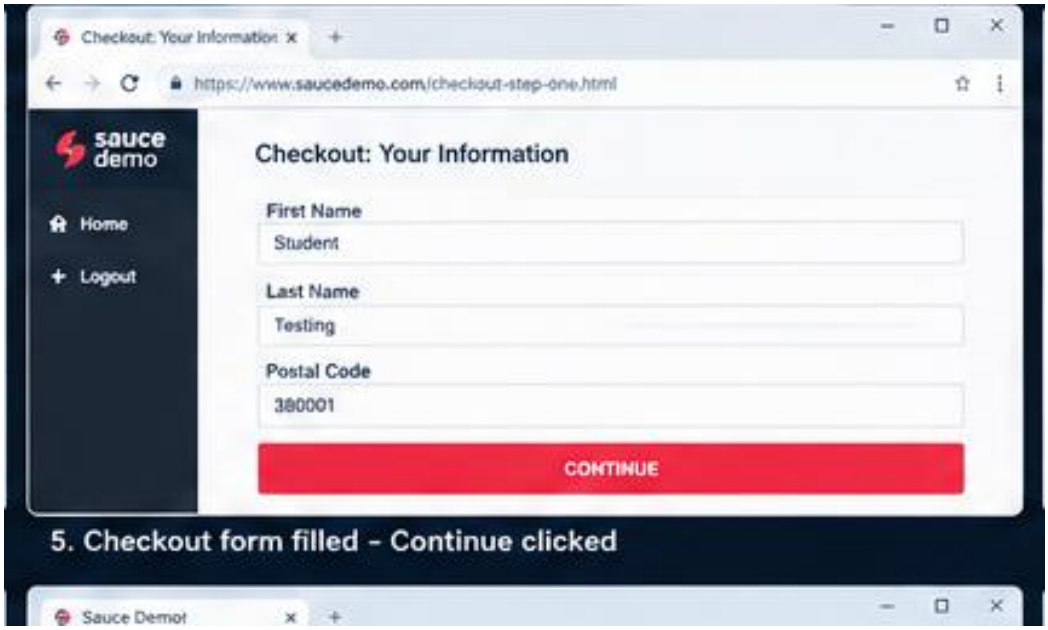

- ## Scenario ID: 1e

Scenario: Checkout form handling
Test Steps:

1. Click on Checkout
2. Enter First Name: Student
3. Enter Last Name: Testing
4. Enter Postal Code: 380001
5. Click on Continue

Expected / Actual Result: Checkout data accepted without any error.
Status: **Pass**

Screenshots:

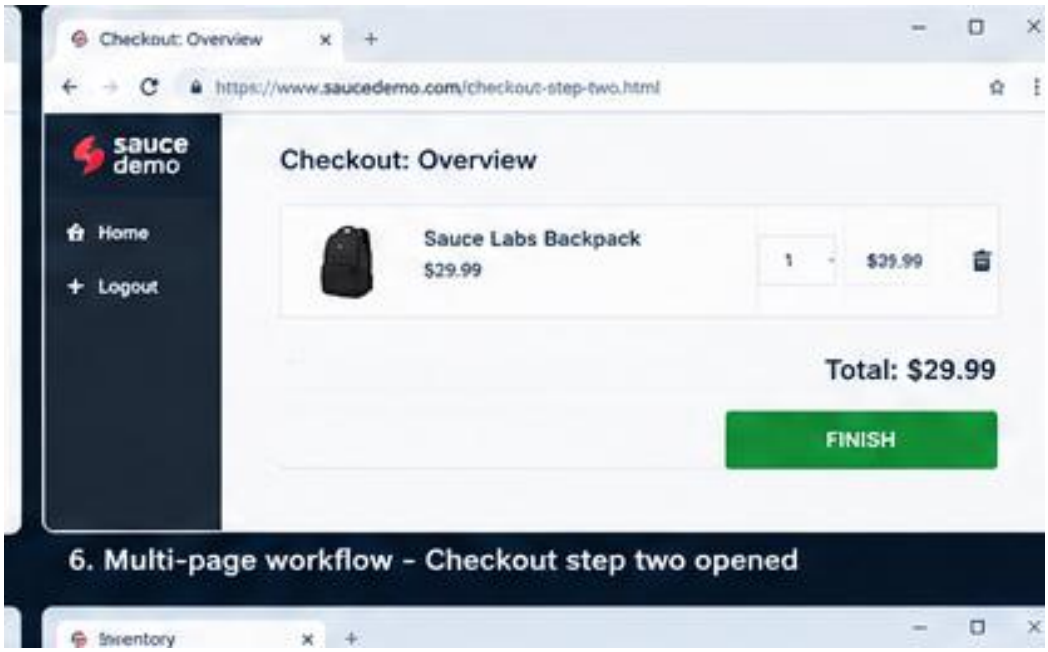

- **Scenario ID: 1f**

Scenario: Multi-page workflow validation
Test Steps:

1. Complete the checkout information step
2. Wait until URL contains "checkout-step-two"
3. Validate the Checkout: Overview page

Expected / Actual Result: Correct page (checkout-step-two) opened.
Status: **Pass**
Screenshots:

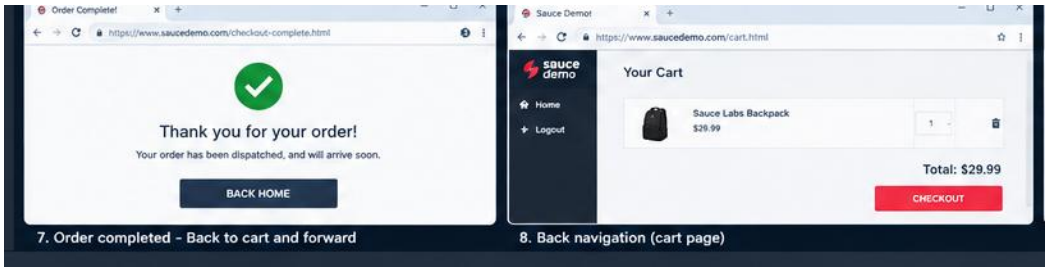

- **Scenario ID: 1g**

Scenario: Browser back and forward navigation
Test Steps:

1. Perform driver.back()
2. Perform driver.forward()
3. Verify the application navigates correctly

Expected / Actual Result: Back and forward navigation worked correctly.
Status: **Pass**
Screenshots:

- **Source Code (tutorial11.py)**

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.support.ui import WebDriverWait
from selenium.webdriver.support import expected_conditions as EC

driver = webdriver.Chrome()
driver.maximize_window()
wait = WebDriverWait(driver, 10)

try:
    # 1. Open Website
    driver.get("https://www.saucedemo.com/")
    print("Website opened successfully")

    # 2. Login
    wait.until(
        EC.visibility_of_element_located((By.ID, "user-name"))
    ).send_keys("standard_user")
    driver.find_element(By.ID, "password").send_keys("secret_sauce")
    driver.find_element(By.ID, "login-button").click()

    # 3. Validate Products Page
    wait.until(EC.url_contains("inventory"))
    assert "inventory" in driver.current_url
    print("Login Test: PASS")

    # 4. Product Selection
    wait.until(
        EC.element_to_be_clickable((By.ID, "add-to-cart-sauce-labs-backpack"))
    ).click()
    print("Product Selection: PASS")

    # 5. Open Cart
    driver.find_element(By.CLASS_NAME, "shopping_cart_link").click()
    assert "cart" in driver.current_url
    print("Cart Navigation: PASS")

    # 6. Checkout
    driver.find_element(By.ID, "checkout").click()
```

```
    # 7. Checkout Form
    wait.until(
        EC.visibility_of_element_located((By.ID, "first-name"))
    ).send_keys("Student")
    driver.find_element(By.ID, "last-name").send_keys("Testing")
    driver.find_element(By.ID, "postal-code").send_keys("380001")
    driver.find_element(By.ID, "continue").click()

    # 8. Validate Multi-page Workflow
    wait.until(EC.url_contains("checkout-step-two"))
    assert "checkout-step-two" in driver.current_url
    print("Multi-Page Workflow: PASS")

    # 9. Back and Forward
    driver.back()
    driver.forward()
    print("Back/Forward Navigation: PASS")

finally:
    driver.quit()
    print("Tutorial 11 Completed Successfully")
```

- **Console Output (PyCharm)**

```
Website opened successfully
Login Test: PASS
Product Selection: PASS
Cart Navigation: PASS
Multi-Page Workflow: PASS
Back/Forward Navigation: PASS
Tutorial 11 Completed Successfully
```

- **Summary Of Test Results:**

Total Test Cases- 7
Passed- 7
Failed- 0
Pass %- 100%

Conclusion and Recommendations:

Pass Rate: 100%, All Tests Passed

The Selenium WebDriver script successfully automated website navigation, login form handling, product selection, cart navigation, checkout form handling and the multi-page workflow of the SauceDemo application. All assertions passed and the browser back/forward navigation worked as expected.

Issues Found

No issues or defects were found during execution of the automated test scenarios.

Recommendations

1. **Add Negative Test Cases**
   Extend the script with invalid login (locked_out_user, wrong password) and empty checkout form validation scenarios.

2. **Use Page Object Model**
   Separate locators and actions into page classes to make the script easier to maintain.
3. **Run as Regression Suite**
   Re-execute the script after every change to confirm that existing functionality is unaffected.

- **Bug Reports:**

No bugs were reported for this practical, as all test cases passed.
