SILVER OAK UNIVERSITY

TUTORIAL - 6 | Manual Test Execution

Aim: Apply manual test cases using multiple input conditions and prepare detailed test execution and summary reports.
Application Under Test: Snapchat Web (https://accounts.snapchat.com / https://www.snapchat.com)

Module Name: Login Page - Functional & UI Test Cases

Test Case ID: st_01
Webpage URL: https://accounts.snapchat.com
Total Test Cases: 9
Tester Name: Aman Sevak

Scenario ID: 1a | Login with valid username/email

Test Steps:

1. Open Snapchat login page
2. Enter valid Username or Email
3. Click Next
4. Enter valid Password
5. Click Next / Log In

Expected Result: User successfully logs in and lands on Snapchat dashboard
Actual Result: Login successful; redirected to Snapchat home page
Status: PASS

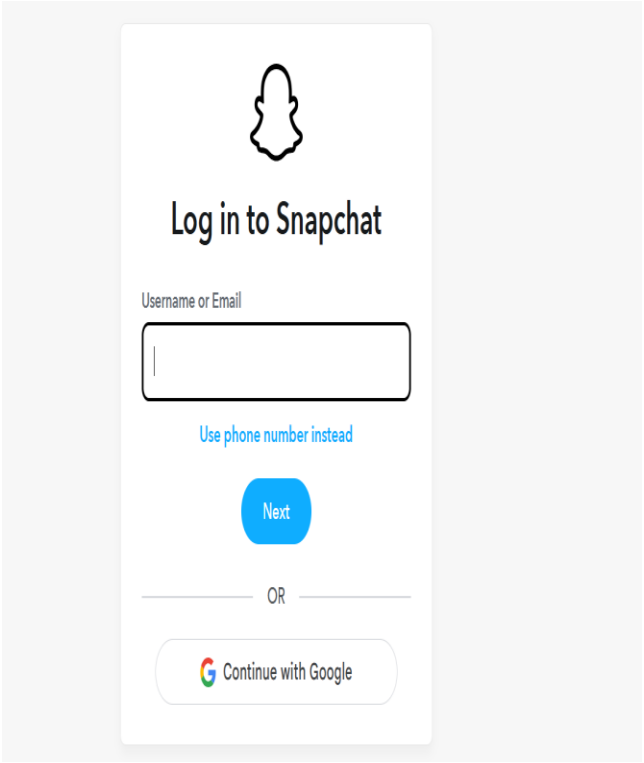

Figure 1a: Snapchat Login Page – Username/Email entry

Scenario ID: 1b | Login with wrong password

Test Steps:

1. Open Snapchat login page
2. Enter valid Username
3. Click Next

4. Enter incorrect Password
5. Click Next

Expected Result: Error message shown – "Incorrect password, please try again."
Actual Result: Error displayed: "Incorrect password, please try again."
Status: PASS

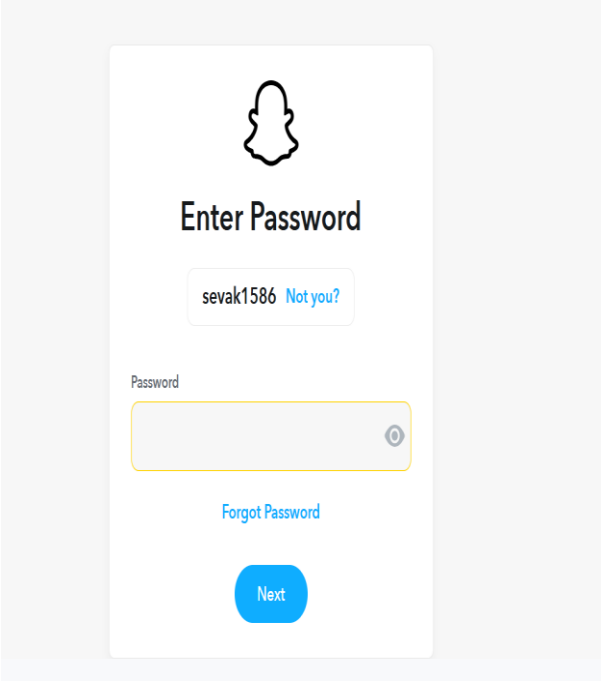

Figure 1b-1: Enter Password screen

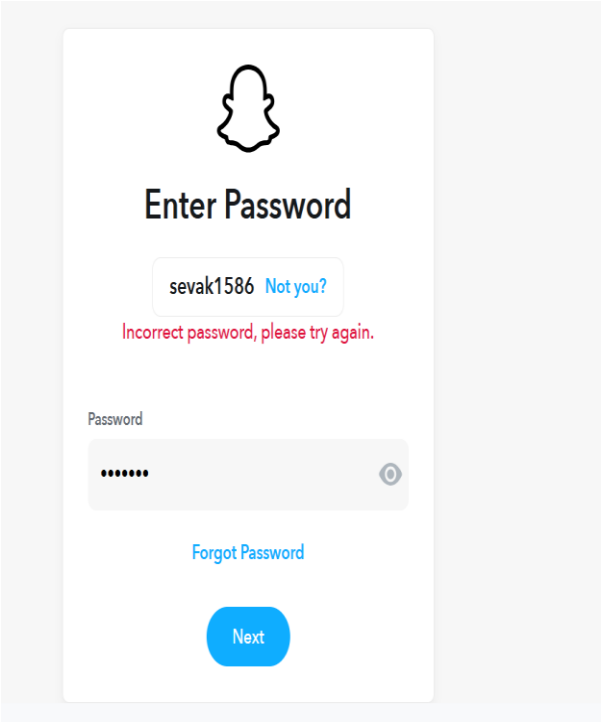

Figure 1b-2: Incorrect password error message

Scenario ID: 1c | Login with empty username field

Test Steps:

1. Open Snapchat login page
2. Leave Username or Email field blank

3. Click Next

Expected Result: Next button remains disabled or validation error shown
Actual Result: Next button does not proceed; empty field validation prevents submission
Status: PASS

Scenario ID: 1d | Login with empty password field

Test Steps:

1. Enter valid Username
2. Click Next
3. Leave Password field blank
4. Click Next

Expected Result: Cannot proceed; password field is required
Actual Result: Validation prevents empty password submission
Status: PASS

Scenario ID: 1e | Check password visibility toggle (eye icon)

Test Steps:

1. Enter valid Username and click Next
2. Enter Password
3. Click eye icon beside password field

Expected Result: Password becomes visible (unmasked); toggles on second click
Actual Result: Password visibility toggles correctly via eye icon
Status: PASS

Scenario ID: 1f | Forgot Password flow

Test Steps:

1. Enter valid Username and click Next
2. Click on "Forgot Password"
3. Follow verification steps (email confirmation)

Expected Result: System asks to confirm identity via email; verification process starts
Actual Result: Redirected to "Confirm It's You" page; email verification flow starts
Status: PASS

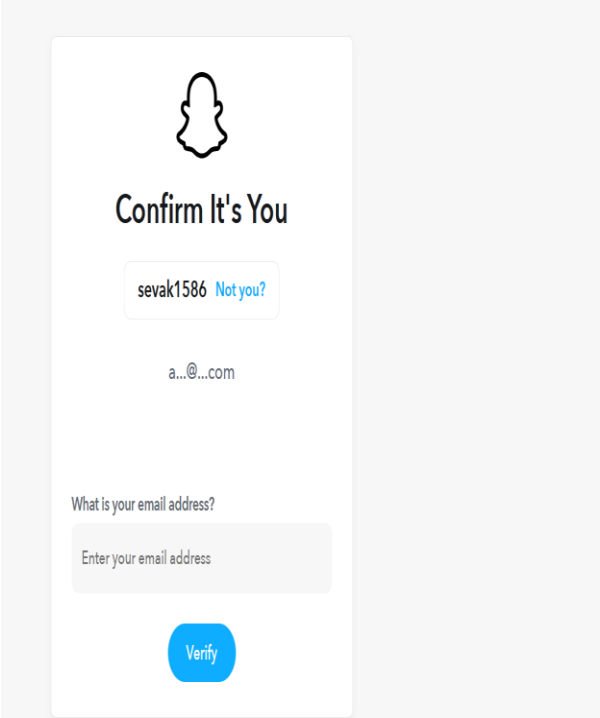

Figure 1f-1: Confirm It's You – Email address prompt

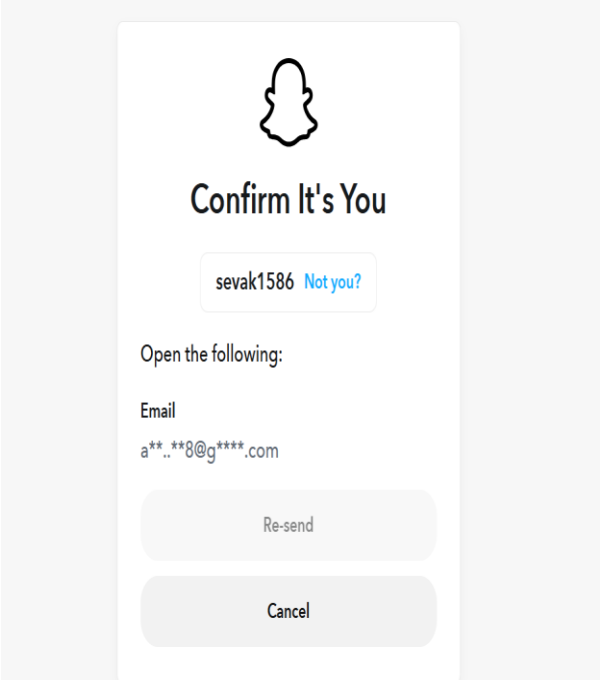

Figure 1f-2: Email verification – Re-send / Cancel options

Scenario ID: 1g | Login using Continue with Google

Test Steps:

1. Open Snapchat login page
2. Click "Continue with Google"
3. Select / enter Google account
4. Grant permissions if prompted

Expected Result: User logged in via Google or redirected for account linking

Actual Result: Google login option available and redirects to Google authentication

Status: PASS

Scenario ID: 1h | Check responsive layout of login form

Test Steps:

1. Open Snapchat login page
2. Resize browser window or open on different screen sizes

Expected Result: Login form remains centered, readable and usable

Actual Result: Form stays responsive and properly aligned on different viewports

Status: PASS

Scenario ID: 1i | Verify session after successful login (Dashboard access)

Test Steps:

1. Login with valid credentials
2. Observe dashboard / profile page
3. Check username display and navigation options

Expected Result: User lands on Snapchat web dashboard with profile, search, chat, camera options

Actual Result: Dashboard loaded successfully showing username, Snapchat+ promo, and navigation

Status: PASS

Summary Of Test Results

Total Test Cases	**9**
Passed	**9**
Failed	**0**
Pass %	**100%**

Conclusion and Recommendations

Pass Rate: 100% — All test cases executed successfully.

The Snapchat web login page was tested for functional and UI scenarios including valid/invalid login, empty field validation, password visibility toggle, forgot password flow, Google social login, responsive layout, and post-login dashboard verification. All 9 scenarios passed without any defects found during this test cycle.

Issues Found

No critical or major issues were observed during the execution of these 9 test cases. All expected behaviours matched the actual results.

Recommendations

1. Continue monitoring rate-limiting behaviour on repeated failed login attempts in future regression cycles.
2. Extend testing to cover multi-factor authentication (if enabled) and session timeout scenarios.
3. Perform cross-browser testing (Chrome, Firefox, Edge, Safari) for full coverage.
4. Add accessibility checks (keyboard navigation, screen-reader labels) in upcoming tutorials.
