Test Steps:

Proceed from Passenger details to Review and then Payment

Observe the Fare Summary (Ticket Fare, Convenience Fee, PG Charges, Travel Insurance, Total Amount)

Observe the available payment methods (UPI, Card, Net Banking, Wallet, Pay Later)

Screenshots:

Summary Of Test Results:

Total Test Cases - 10
Passed - 10
Failed - 0
Pass % - 100%

Conclusion and Recommendations:

Pass Rate: 100% - All executed scenarios behaved as expected.

Observations

1. The Login page correctly validated wrong credentials and displayed an appropriate error message.
2. The Registration and Search Trains pages correctly displayed field-level validation errors when submitted with empty mandatory fields.
3. The ticket booking flow (Search -> Select -> Passenger Details -> Payment) worked as expected end-to-end with correct fare calculation.

Recommendations

1. Add inline captcha-refresh confirmation so users know a new captcha has loaded.
2. Show a password-strength indicator on the Registration page to guide users while creating a password.
